Part I. Coverage Under this Permit

- A. Permit Area.** The permit covers all areas of the State of Mississippi.
- B. Eligibility.** For discharges composed entirely of storm water from construction activity including clearing, grading, excavation and other land disturbance activities disturbing 5 or more acres.
- C. Authorization.** Owners and/or prime contractors must submit a Construction Notice of Intent (CNOI) in accordance with the requirements of Part II. Owners or operators are authorized to discharge storm water associated with construction activity under the terms and conditions of this permit only upon receipt of written notification of approval of coverage by the Mississippi Department of Environmental Quality (MDEQ), Office of Pollution Control (OPC) staff. Upon review of the CNOI, the staff may deny coverage and require an alternate permit. The OPC staff decisions may be brought before the MDEQ Permit Board for review and reconsideration at a regularly scheduled meeting. Discharge of storm water without written notification of coverage or issuance of an individual National Pollutant Discharge Elimination System (NPDES) Storm Water Permit is a violation of state law.
- D. Requiring an Individual Permit or Alternative General Permit**
1. The OPC may require any coverage recipient to apply for and obtain either an individual or an alternative general NPDES permit. Any interested person may petition the OPC to take action under this paragraph. The OPC may require any coverage recipient to apply for an individual NPDES permit only if the owner or operator has been notified in writing. This notice shall include reasons for this decision, an application form and a filing deadline. The OPC may grant additional time upon request. If a coverage recipient fails to submit a requested application in a timely manner, coverage under this permit is automatically terminated at the end of the day specified for application submittal.
 2. Any coverage recipient may request to be excluded from permit coverage by applying for an individual permit or coverage under another general permit. The person shall submit an individual application (Form 1 and the narrative requirements of 40 CFR 122.26(c)(1)(ii)) or appropriate NOI to the Office of Pollution Control.
 3. Coverage under this permit is automatically terminated on the issuance or coverage date of the respective alternate individual or general NPDES permit. When an alternate individual or general NPDES permit is denied, coverage under this permit continues unless terminated on the date of such denial by the OPC.

Part II. Construction Notice of Intent

- A. Deadlines for Notification.** Persons desiring coverage for a storm water discharge associated with construction activity under this general permit shall submit a CNOI form at least 30 days prior to the commencement of construction, or 15 days if the storm water pollution prevention plan has previously been approved. CNOI forms may be obtained from the MDEQ at the address on the following page or by calling 601/961-5171. CNOI forms, as well as the general permit and guidance manual, may also be found on the MDEQ web site at www.deq.state.ms.us. Coverage under this permit will not be granted until all other required MDEQ permits are satisfactorily addressed.
- B. Deadlines for Notification for Previously Exempted Municipalities.** Storm water discharges from construction activities greater than or equal to 5 acres, owned or operated by a municipality with a population of less than 100,000, are exempted from NPDES permitting by the Intermodal Surface Transportation Efficiency Act of 1991. By existing federal regulations, this exemption ends March 10, 2003. Projects submitted after March 10, 2003 will require a CNOI and SWPPP 30 days prior to construction.
- C. Submission by Owner and/or Prime Contractor.** The owner or prime contractor may submit the CNOI. The owner may submit the CNOI and later, prior to actual construction, the prime contractor may submit the CNOI certification accepting responsibility for permit compliance. Otherwise the initial applicant is solely responsible for permit compliance.

- D. Where to Submit the Construction Notice of Intent.** Complete and appropriately signed CNOI Forms must be submitted to:

**Chief, Environmental Permits Division
MS Dept of Environmental Quality, Office of Pollution Control
P.O. Box 10385
Jackson, Mississippi 39289-0385**

- E. Additional Notification.** The covered owner or prime contractor must notify the OPC at least thirty days before any planned changes of ownership or whenever there are any other changes in information previously submitted to the OPC in the CNOI.
- F. Renotification.** Coverage recipients under the previous permit will receive re-coverage forms with a letter of instruction. If a coverage recipient wishes to be covered by the current Construction Storm Water Permit this form must be completed and returned to the OPC within 30 days. If the project has been completed, and no significant water quality problems exist, the OPC will terminate permit coverage. If the covered project is still active, monthly reporting and termination procedures shall continue in accordance with Part IV. E. and H. A resubmittal of the SWPPP is not required. After this permit expires (see Part V.B), and when this permit is reissued, re-notification must be made in accordance with the requirements of the reissued permit.
- G. Failure to Notify.** Persons who fail to submit a CNOI and discharge storm water associated with construction activity to waters of the State without an NPDES permit are in violation of state law.

Part III. Storm Water Pollution Prevention Plan (SWPPP)

- A. SWPPP Development.** A SWPPP shall be developed by each owner or prime contractor subject to this permit. A SWPPP shall be prepared in accordance with sound engineering practices and shall identify potential sources of pollution, which may reasonably be expected to affect the quality of storm water discharges associated with construction activity. The SWPPP shall describe and ensure the implementation of practices, which will reduce pollutants in storm water discharges and assure compliance with the terms and conditions of this permit.
1. The SWPPP shall be submitted to the OPC, with a copy retained at the permitted site or locally available. A copy of the SWPPP must be made available to the OPC inspectors for review at the time of an on-site inspection.
 2. The SWPPP and a United States Geological Survey (USGS) quad map, or photocopy, extending at least one-half mile beyond the facility property boundaries with the site location outlined or highlighted shall be submitted with the CNOI.
 3. The SWPPP shall provide for compliance with the terms of the plan upon commencement of construction.
 4. The OPC may notify the covered owner or prime contractor at any time that the SWPPP does not meet the minimum requirements of this Part. After notification, the covered owner or prime contractor shall amend the SWPPP and certify in writing to the OPC that the requested changes have been made. Unless otherwise provided by the OPC, the requested changes shall be made within 15 days.
 5. The owner or prime contractor shall amend the SWPPP whenever there is a change in design, construction, operation, or maintenance, which may potentially effect the discharge of pollutants to State waters or the SWPPP proves to be ineffective in controlling storm water pollutants, and shall submit it to the OPC within 30 days of amendment.
- B. Compliance with Local Storm Water Ordinances.**
1. The SWPPP shall be in compliance with all local storm water ordinances. Approved SWPPPs that conform to local storm water ordinances shall receive expedited review from the OPC (notification from local authority is required).

2. When storm water discharges into a municipal storm sewer system, the owner or prime contractor shall make the SWPPP available to the municipal authority upon request.

C. SWPPP Details.

1. **Erosion and Sediment Controls.** The owner or prime contractor shall list and describe controls appropriate for the construction activities and procedures for implementing such controls. The controls should: (1) divert up-slope water around disturbed areas of the site; (2) limit the exposure of disturbed areas to the shortest amount of time as possible; (3) minimize the amount of surface area that must be disturbed; (4) implement best management practices to mitigate adverse impacts from storm water runoff; and (5) remove sediment from storm water before it leaves the site. **As a minimum, the controls must be in accordance with the standards set forth in " Planning and Design Manual for the Control of Erosion, Sediment & Stormwater," MDEQ, MSSWCC, U. S. Dept. of Agriculture SCS, Jackson, MS, 1994, or other recognized manual of design.** The description shall address the following minimum components.

- a. **Vegetative practices** shall be designed to preserve existing vegetation where possible and re-vegetate disturbed areas as soon as practicable after grading or construction. Such practices may include surface roughening, temporary seeding, permanent seeding, mulching, sod stabilization, vegetative buffer strips, and protection of trees. When a disturbed area will be left undisturbed for thirty days or more, the appropriate temporary or permanent vegetative practices shall be implemented within seven calendar days.
- b. **Structural practices** shall divert flows from exposed soils, store flows or otherwise limit runoff from exposed areas. Such practices may include construction entrance/exit, straw bale dikes, silt fences, earth dikes, brush barriers, drainage swales, check dams, subsurface drain, pipe slope drain, level spreaders, drain inlet protection, outlet protection, detention/retention basins, sediment traps, temporary sediment basins or equivalent sediment controls.

For drainage locations (a drainage point at boundary of land disturbing activity) that serve an area with 10 or more disturbed acres at one time, a temporary (or permanent) sediment basin providing at least 1800 cubic feet (67 cubic yards) of storage per acre drained shall be provided until final stabilization of the site. Sediment basins must be installed before major site grading. When sediment basins can not be installed, a written rationale explaining why must be included in the SWPPP.

- c. **Post construction control measures** shall be installed to control pollutants in storm water after construction is complete. These controls include, but are not limited to, one or more of the following: on-site infiltration of runoff, flow attenuation using open vegetated swales, exfiltration trenches and natural depressions, constructed wetlands and retention/detention structures. Where needed, velocity dissipation devices shall be placed at detention or retention pond outfalls and along the outfall channel to provide a non-erosive flow. Justification may be required where control measures are not used.
 - d. **Controls for individual lots in subdivisions and commercial developments** shall be required for lots that are less than five acres. Plans for subdivisions and commercial developments shall require that builders or lot owners take measures to prevent or mitigate sediment from leaving individual lots. This can be accomplished through, covenants and/or lot purchase contract language. A copy of the chosen option must be submitted with the SWPPP.
2. **Housekeeping Practices.** The owner or prime contractor shall describe and list practices appropriate to prevent pollutants from entering storm water from construction sites because of poor housekeeping. The owner or prime contractor shall designate areas for equipment maintenance and repair; concrete chute wash off; provide waste receptacles at convenient locations and provide regular collection of waste; provide protected storage areas for chemicals, paints, solvents, fertilizers, and other potentially toxic materials; and provide adequately maintained sanitary facilities.

3. **Prepare Scaled Site Map(s).** The owner or prime contractor shall prepare a scaled site map showing original and proposed contours (if practicable), drainage patterns, adjacent receiving water bodies, north arrow, all erosion & sediment controls (vegetative and structural), post construction control measures as described in Part III.C. and location of housekeeping practices. If the construction project is a linear construction project (e.g., pipeline, highway, etc.), a scaled site map is not required, however standard diagrams (e.g., cross sections showing dimensions and labeled components) of erosion and sediment controls to be used must be submitted.
4. **Implementation Sequence.** The owner or prime contractor shall prepare an orderly listing which coordinates the timing of all major land-disturbing activities together with the necessary erosion and sedimentation control measures planned for the project.
5. **Implementation of Controls.** The SWPPP shall require the owner or prime contractor, in disturbing an area, to implement controls as needed to prevent erosion and adverse impacts to receiving streams (see Part IV.C.1. & 2.).
6. **Maintenance and Weekly Inspections.** Describe procedures to maintain vegetation, erosion and sediment controls and other protective measures. Procedures shall provide that all erosion controls are inspected at least once every seven-calendar days (see Part IV.D. and E.).

Part IV. Limitations and Requirements

A. Non-Numeric Limitations. Storm water discharges shall be free from:

1. debris, oil, scum, and other floating materials other than in trace amounts;
2. eroded soils and other materials that will settle to form objectionable deposits in receiving waters;
3. suspended solids, turbidity and color at levels inconsistent with the receiving waters;
4. chemicals in concentrations that would cause violation of State Water Quality Criteria in the receiving waters.

B. Public Notice Requirements. The coverage recipient shall display proof of coverage at a conspicuous place accessible by the public on or at the edge of the construction site. Information on the "Proof of Coverage Form" shall include permit coverage number, project contact name, project contact phone number, project description and SWPPP location (only necessary if the site is inactive or does not have an on-site location) and MDEQ's phone number. A form is provided in Part X for this purpose and must be protected from weather while posted.

C. Implementation Requirements. Coverage recipient shall:

1. install needed erosion controls even if they may be located in the way of subsequent activities, such as utility installation, grading or construction. It shall not be an acceptable defense that controls were not installed because subsequent activities would require their replacement or cause their destruction;
2. install additional and/or alternative erosion and sediment controls when existing controls prove to be ineffective in preventing sediment from leaving the site;
3. minimize off-site vehicle tracking of sediments;
4. comply with applicable State or local waste disposal, sanitary sewer or septic system regulations;
5. have daily access to nearby rain gage data or set up a rain gage on-site during construction to comply with Part IV.D.;
6. maintain all erosion controls. As a minimum all accumulated sediment shall be removed from controls when it reaches 1/3 to 1/2 the height of the control and properly disposed. Non-functioning controls shall be repaired, replaced or supplemented with functional controls within 24 hours of discovery or as soon as field conditions allow.

- D. Inspection Requirements.** Inspection of all erosion controls and other SWPPP requirements shall be performed during permit coverage using a copy of the form provided in Part VII. Inspections shall be performed:
1. at least once every seven calendar days;
 2. within 24 hours after commencement of a rainfall event greater than or equal to a two year 24 hour storm event, 6 inches on the Gulf Coast to 4 inches at the Tennessee State border;
 3. as often as is necessary to ensure that appropriate erosion and sediment controls have been properly constructed and maintained and determine if additional or alternative control measures are required.
- E. Reporting.** The inspections described in D. must be documented on copies of the Report and Certification Form provided in Part VII. The completed inspection forms must be kept with the SWPPP until such time the project is ready for termination of reporting and permit coverage as described in Part IV.H.
- F. Retention of Records.** All records, reports and information resulting from activities required by this permit shall be retained for a period of at least three years from the date of the CNOI, inspection or report.
- G. Noncompliance Reporting.**
1. **Anticipated Noncompliance.** The owner or operator shall give at least 10 days advance notice, if possible, before any planned noncompliance with permit requirements.
 2. **Unanticipated Noncompliance.** The owner or operator shall notify the OPC orally within 24 hours from the time he or she becomes aware of unanticipated noncompliance. A written report shall be provided to the OPC within 5 working days of the time he or she becomes aware of the circumstances. The report shall describe the cause, the exact dates and times, steps taken or planned to reduce, eliminate, or prevent reoccurrence and, if the noncompliance has not ceased, the anticipated time for correction.
- H Termination of Reporting and Permit Coverage.**
1. Upon successful completion of all permanent erosion and sediment controls for a covered project a completed Notice of Termination (NOT) of Coverage form (provided in Part VIII.) shall be submitted to the OPC. All monthly inspection forms described in Part IV.E. and provided in Part VII. must be attached. Upon receiving the completed NOT and associated inspection forms the OPC will inspect the site. If no sediment and erosion control problems are identified and adequate permanent controls are established the owner or prime contractor will receive a termination letter from the OPC. Coverage is not terminated until done so in writing by the OPC.
 2. Upon reissuance of this permit, if the owner or prime contractor does not submit a re-coverage CNOI form in accordance with Part II.F., coverage will be terminated.

Part V. Other Permit Conditions

- A. Duty to Comply.** Any permit noncompliance constitutes a violation of the Mississippi Water Pollution Control Law and is grounds for enforcement action or coverage termination and requiring reapplication in accordance with Part I.D.1. It shall not be a defense in an enforcement action that it would have been necessary to halt or reduce the regulated activity in order to maintain compliance with the conditions of this permit.
- B. Continuation of the Expired General Permit and Coverages Under the Permit.** An expired general permit and coverages under the permit continues in force and effect until a new general permit is issued.
- C. Duty to Mitigate.** The owner or operator shall take all reasonable steps to minimize or prevent any discharge in violation of this permit, which is likely to adversely affect human health or the environment.

- D. Duty to Provide Information.** The owner or operator shall furnish to the OPC, within a reasonable time, any information that the OPC may request to determine compliance with this permit.
- E. Signatory Requirements.** All CNOIs, SWPPPs, reports, certifications or information submitted to the OPC shall be signed as follows or by the duly authorized representative (see F.).
- 1. For a corporation** by a responsible corporate officer. For this permit, a responsible corporate officer means: a) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation; or b) the manager of one or more manufacturing, production or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25,000,000 (in second-quarter 1980 dollars) if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;
 - 2. For a partnership or sole proprietorship** by a general partner or the proprietor, respectively; or
 - 3. For a municipal, State, Federal, or other public agency** by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a Federal agency includes: a) the chief executive officer of the agency, or b) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.
- F. Duly Authorized Representative.** A person is duly authorized to sign submissions to the Office of Pollution Control if:
- 1.** the authorization is made in writing by a person described in E., above, and submitted to the OPC;
 - 2.** the authorization specifies either an individual or a position having responsibility for the overall operation of the regulated activity, such as manager, operator, superintendent or one having overall environmental responsibility (a duly authorized representative may be a named individual or any individual occupying a named position).
- G. Changes to Authorization.** If an authorization is no longer accurate because a different individual or position has permit responsibility, a new authorization satisfying the above requirements must be submitted to the OPC prior to or together with any reports, information or applications signed by the representative.
- H. Certification.** Any person signing documents under this section shall make the following certification. I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
- I. Oil and Hazardous Substance Liability.** Nothing in this permit shall relieve the owner or operator from responsibilities, liabilities, or penalties under Section 311 of the CWA.
- J. Property Rights.** The issuance of this permit does not convey any property rights of any sort, nor any exclusive privileges, nor does it authorize any injury to private property nor any invasion of personal rights, nor any infringement of Federal, State or local laws or regulations.
- K. Severability.** The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.

- L. **Transfers.** Coverage under this permit is not transferable to any person except after notice to and approval by the OPC. The OPC may require the permittee to obtain another NPDES permit as stated in Part I.D. Transfer of coverage requests shall be submitted to the OPC using the form provided in Part IX.
- M. **Proper Operation and Maintenance.** The owner or operator shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the owner or operator to achieve compliance with the conditions of this permit including the storm water pollution prevention plan. Proper operation and maintenance includes adequate laboratory controls with appropriate quality assurance procedures and requires the operation of backup or auxiliary facilities when necessary to achieve compliance with permit conditions.
- N. **Bypass Prohibition.** Bypass (see 40 CFR 122.41(m)) is prohibited and enforcement action may be taken against a owner or operator for a bypass, unless: **a)** The bypass was unavoidable to prevent loss of life, personal injury, or severe property damage; **b)** There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This conditions is not satisfied if the owner or operator should, in the exercise of reasonable engineering judgement, have installed adequate backup equipment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and **c)** The owner or operator submitted notices per Part IV.G.
- O. **Upset Conditions.** An upset (see 40 CFR 122.41(n)) constitutes an affirmative defense to an action brought for noncompliance with technology-based permit limitations if a permittee shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence, that: **1)** An upset occurred and the permittee can identify the specific cause(s) of the upset, **2)** The permitted facility was at the time being properly operated, **3)** The permittee submitted notices per Part IV.G.2., and **4)** The permittee took remedial measures as required under Part V.C. In any enforcement proceeding, the permittee has the burden of proof that an upset occurred. No determination made during administrative review of claims that noncompliance was caused by upset, and before an action for noncompliance, is final administrative action subject to judicial review.
- P. **Inspection and Entry.** The owner or operator shall allow the OPC or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to;
 1. enter upon the owner or operator's premises where a regulated activity is located or conducted or where records must be kept under the conditions of this permit;
 2. have access to and copy at reasonable times any records that must be kept under the conditions of this permit; and
 3. inspect at reasonable times any facilities or equipment.
- Q. **Permit Actions.** This permit may be modified, revoked and reissued, or terminated for cause. A request by the owner or operator for permit or coverage modification, revocation and reissuance, or termination, or a certification of planned changes or anticipated noncompliance does not stay any permit condition.

Part VI. Reopener Clause

- A. **Requirement to Obtain Individual or Alternative General Permit.** If there is evidence indicating potential or realized impacts on water quality due to storm water discharge covered by this permit, the owner or operator may be required to obtain individual permit or an alternative general permit in accordance with Part I.D. or the permit may be modified to include different limitations and/or requirements.
- B. **Permit Modification.** Permit modification or revocation will be conducted according to 40 CFR 122.62, 122.63, 122.64 and 124.5.

Project Name (please print): _____

Physical Project Location: Street: _____

City: _____ County: _____

Date of successful completion of all permanent erosion and sediment controls (site stabilized): _____

Based upon inspection(s) of the permitted site which I or personnel under my direct supervision conducted, I certify under penalty of law that construction or disturbance activities have ceased, all erosion and sediment controls have been implemented and maintained, that disturbed soils have been stabilized, all temporary erosion and sediment control measures have been removed and all permanent erosion and sediment controls have been successfully completed. I understand that by submitting this notice of termination, that I am no longer authorized to discharge storm water associated with construction activity by Mississippi's Construction NPDES Storm Water General Permit, and that discharging pollutants in storm water associated with construction activity, not authorized by coverage under Mississippi's Construction NPDES Storm Water General Permit, to waters of the United States is unlawful under the Clean Water Act. I also understand that the submittal of this notice of termination does not release an operator from liability for any violations of Mississippi's Construction NPDES Storm Water General Permit or the Clean Water Act. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

Proof of Coverage Under the State of Mississippi's Storm Water Construction Permit

Use this form to display proof of coverage under Mississippi's Storm Water Construction Permit at a conspicuous site (accessible to the public) on or at the edge of the construction site. If the construction project is a linear construction project (e.g., pipeline, highway, etc.), the proof of coverage must be placed in a publicly accessible location near where construction is actively underway and moved as necessary. If exposed to the weather please laminate before posting.
